Softrend is an upholstered furniture manufacturer established in 1997

- Thanks to over 20 years of experience in manufacturing soft furniture, we know how important is good design, comfort, and durability. Our made-to-order public space collection meets the same standards.
- All our products are made by hand in Europe, in our own factory in Estonia. We manage the process from idea to final product, to be sure that everything meets our sustainability and quality standards. We appreciate the benefits of a small company that provide us with flexibility, a personal approach and the ability to react quickly
- We are a family company. Making decisions in the family means considering the long term. This is why our decisions are based on the idea of sustainable development, according to which you need to consider the environment and other people's needs in business and production.
- Great things happen through collaboration. We work together with different designers to offer innovative products to contemporary offices and public spaces.

Made in Estonia

- Having been making soft furnishings for more than 20 years, we view comfort and quality in very special terms: more than just words, taking in the team and materials and techniques that give our items of furniture the form and feel that allow you to feel truly relaxed when using them.
- The right sofa is both beautiful and functional – suited to your interior and tailored to your lifestyle. Softrend's wide range of models, sizes and cover materials allows us to create a sofa that's just right for you. Of course, good furniture has to be of the highest quality. That's why all of our sofas are manufactured in our own factory in Estonia.

Made to last. Sustainably.

We are making a conscious effort to be able to proudly call ourselves a waste-free company

- We believe all materials should be used sustainably – our product range includes Green label collection – sofas, pillows, and poufs made of leftover materials as well as an upcycling product range created in cooperation with renowned designer Reet Aus.
- Our contract fabric collection includes cover materials that are made from recycled plastic bottles.
- We organised a drawing competition for children to design soft toy animals together with MiaPuPe. These toys are made by seamsters with hearing impairments using leftover materials from Softrend's factory. Part of the profits from each toy is donated to students with hearing impairments.
- Everything we make and deliver to our private customers is packaged using recyclable material.
- Softrend is making an effort to become a waste-free company and is looking for new ways and new technologies to use all sorts of excess material without creating more waste. For example, we use a special cutting machine to minimise waste when cutting fabric.

Our quality standard

FUNCTIONALITY

Durable, high-quality materials: 5-year guarantee on solid wood frames

High-quality fabrics: a carefully selected collection

Comprehensive and continuous product development: every product has its own story

The right sofa for you: we prepare it according to your exact requirements so that you will be satisfied with your sofa for a long time

DESIGN

Wide selection: different models, dimensions and upholstery options

More than just a sofa: many compatible products

Softrend's style: timelessness and calm in a Nordic way

A sofa that looks good should also be comfortable: we collaborate with leading designers

SERVICE

20 years of experience: we understand you and can recommend furniture that is perfect for your lifestyle and needs

Follow-up service: our team will be happy to take care of Softrend products, even if they are already yours

Design-conscious consultants: all our employees are fans of Softrend's products

metal: black

Additional information

cover material is not removable

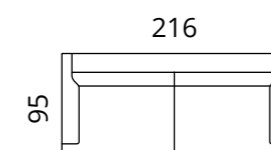

Design: Argo Tamm

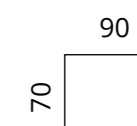

There's always someone at a party who has something about them that makes everyone else look to them as though something important's happening. Someone who's always elegant whatever their style. They might not say much, but every word is welcomed. The Abbot plays that role among our sofas. Its elegant form looks good in any interior. **It doesn't require much care because both the seat and back cushions are fixed.** Bring out Abbott's timeless form with a classic fabric, or conversely, create intrigue by opting for a bright, trendy colour. The Abbott can make anything work.

Adamson

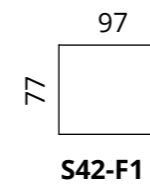

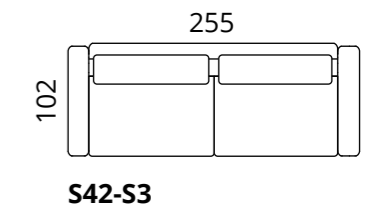

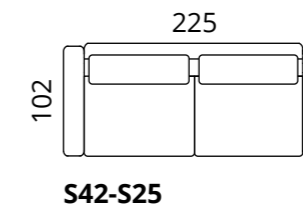

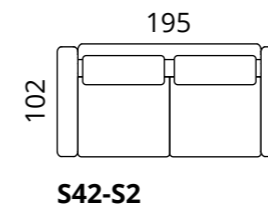

- > Very soft and comfortable
- > Looks good even in the middle of a room

Design: Argo Tamm

Having been making sofas for more than 20 years, Softrend views comfort and quality in very special terms: more than just words, but taking in the materials and techniques that give our sofas the form and feel that allow those using them to feel truly relaxed. Adamson has been designed from the inside out. First, designer Argo Tamm tried to work out what would make sitting on this sofa as comfortable as possible. This is how its external appearance took shape.

Adamson is a masterclass of comfort. Thanks to its feather cushions, it offers just the right amount of both softness and fullness. Understated but refined, it will find a home in a wide range of interiors. Simply choose the size and cover material that suit you and enjoy!

Product information

Back cushions

the selection includes feather filling, fibre

Legs

ash, tones: oak, whitewashed, wenge
metal: black

Additional information

cover removable from the seat and back cushions;
100% cotton lining

Bait

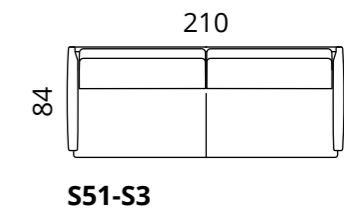

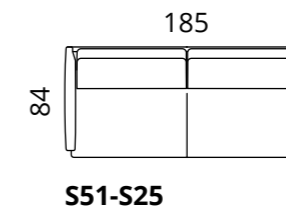

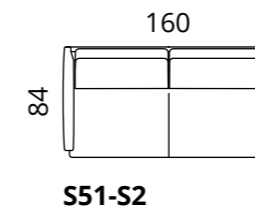

- > Nordic minimalism
- > Suitable for small rooms
- > Compact design with slender legs and thin armrests

Disain: Argo Tamm

The compact heart of a contemporary home. Scandinavian in the simplicity of its lines, Bait provides maximum space for relaxation thanks to its slender armrests. The back of the sofa is slightly curved to support the lower back while sitting. Its tall, slim metal legs amplify the ethereal feel of the sofa, highlight its proportions and make cleaning underneath it very easy.

Bait is particularly well suited to smaller living rooms in which every centimetre counts. Thanks to its narrow armrests and slender back, its dimensions are reduced to the bare minimum. Its name comes from the compact nature of the sofa – with a byte being one of the smallest units of information used in computers.

Don

- > Modular sofa
- > Moduls are easily rearrangeable
- > Increased seat depth

You can use the modules of the Don sofa to create the combination that is perfect for your lounge. And all you need to do to redesign your room is rearrange the sofa modules! But, above all – Don is very comfortable. The deep and soft sofa welcomes you with an embrace when you want to relax in peace. You can use the modules of Don to design a cosy little corner or a spacious lounge.

Modules to combine

covers are not removable

Additional pillows

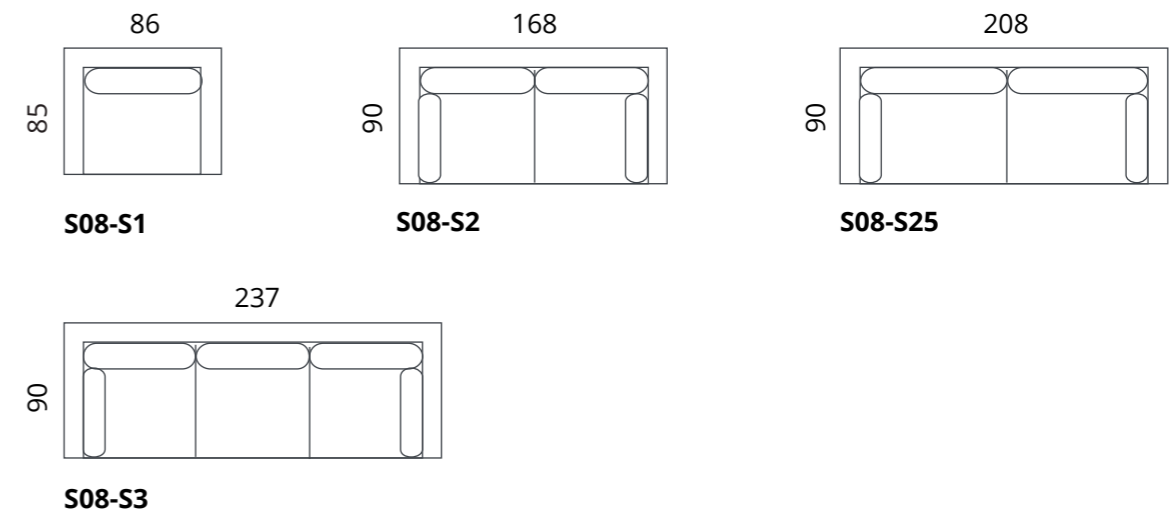

Benny

- > Looks good even in the middle of a room
- > Compact
- > Reversible seat cushions

The Benny's retro vibe, its lean, outward-pointing armrests and its cone-shape legs, which make the sofa seemingly hover mid-air, add a touch of mature curiosity to the room. The compact dimensions of the sofa, which are evident in its depth and light design, set no limits on the size of the room. There are an infinite number of interiors where the Benny's nature just seems to blossom, from historic surroundings to hipster-style concrete interiors.

Product information

Legs

ash, tones: whitewashed, oak, wenge

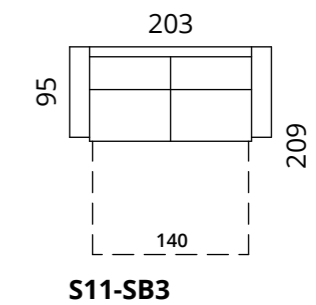

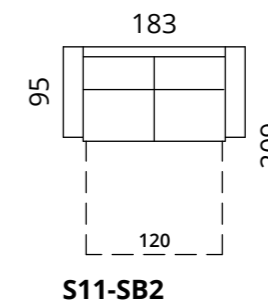

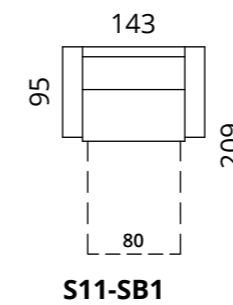

Additional information

upholstery on seat and back cushions is removable;
100% cotton lining; option of adding headboard

Emma

- › Sofa bed with mattress
- › Easy to open and fold
- › Cushions go underneath the mechanism and require no extra storage

Emma has all of the qualities we like in a sofa bed: a **mattress that enables you to get sufficient rest**, functionality and comfort when sitting. It is important to be able to open and fold sofa beds with one simple movement, and to be able to do so every day if you have to. Storing the cushions should not take up extra room, and the sofa bed should have a storage box. Emma's functions resemble those of the model Simon, whereas its design is less like the minimalist Simon and more feminine and glamorous.

Product information

Hugo

> Cover material fully removable

The Hugo is an unbelievably comfortable sofa – just the right sort of soft and shapely. **Soft down cushions and increased depth** let you take full advantage of it whenever you have the chance to sit or lie down. The fully removable cover material means you can relax and enjoy every second spent on the sofa with your loved ones, whether they be your kids or your pets. The Hugo's default light linen cover material conveys a more Nordic style, but thanks to our wide range of cover materials, you can design this classic sofa to fit your interior. Note: Down cushions need to be beaten every now and again to make sure they retain their form.

Product information

Additional information

cover material fully removable from cushions and frame; 100% cotton lining

Laguuna

- > Increased seat depth
- > Cover material fully removable
- > Reversible cushions
- > Sales classic since 2005

The Laguuna's modest-looking form gives it an air of timelessness – on the one hand it seems plain and melts into the background, but on the other hand it stylishly interacts with any space. The cover material of the sofa is fully removable, meaning you can spruce up the room whenever you need to – whether it's change for change's sake or because you've used the sofa so much you simply have no other choice! If you like your sofas with more depth, then the Laguuna has just what you need.

Linja

- > Looks good even in the middle of a room
- > Compact
- > Solutions for more comfortable lives: high legs

Design: Samuli Naamanka

The Linja, designed by respected Finnish designer Samuli Naamanka, is characteristic of Nordic urbanism. Its smooth, streamlined curves are a rare sight in the world of soft furniture, because producing such designs requires high quality and training. The backrest transitions to armrests in one smooth line, hence the name. The elegant Linja is perfect for Nordic homes where nothing is excessive and every detail has been selected with care and affection. Our wide selection of cover materials means you can customise your Linja sofa: you can turn it into a modest backdrop to an expressive room or opt for bold colours to make it a real eye-catcher. Rest assured that Linja sacrifices nothing in terms of comfort – you're welcome to come and try it out for yourself.

Mac

- > Very deep and soft
- > Cover material fully removable

Design: Argo Tamm

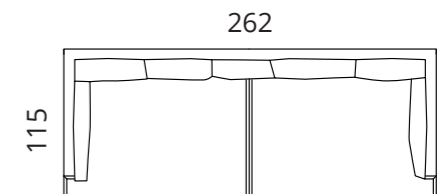

Those who love their homes are loved by their homes in return, with all their heart! If you choose the Mac sofa as the centrepiece of your home, you'll feel that love every time you glance at it. **Mac is big, warm and soft.** By 'soft' we mean very soft, since he comes with a down filling for a truly gentle embrace, and by 'big' we mean very big – there's room for everyone, whether you're sitting together, lounging around or playing games. That said, we completely understand if you want Mac all to yourself: his big, soft, warm embrace means quality time alone and with your home. Mac of course comes with removable covers, since a sofa this comfortable will get plenty of use.

Meta

- > Looks good even in the middle of a room
- > Luxurious and innovative materials
- > Solutions for more comfortable lives: fixed cushions, high legs
- > Increased seat depth

Design: Argo Tamm

We are proud to introduce the Meta – cutting-edge today, a classic tomorrow. The Meta was designed by Argo Tamm to compete among the world's highest-quality and most beautiful sofas. Its solid wood legs are classic and durable, while the innovative memory foam and pocket springs make the sofa comfortable and durable. The Meta will please even the most demanding of tastes, in both appearance and function. Its elegant form matches its light-form functionalism, but it makes for a comfortable corner in a spacious industrial loft as well. It will also find a place in traditional interior design with a focus on wood and natural warmth.

Newman

- > Looks good even in the middle of a room
- > Solutions for more comfortable lives: fixed cushions, high legs
- > Increased seat depth

Customers' favourite 

What do you need in order to please everyone? In the world of sofas, precisely two things: beauty and comfort. We are proud to say that the Newman is not only beautiful and comfortable, but also one of the most popular models among our clients. The Newman's beauty lies in its proportions. It has just enough width and depth while retaining a light, weightless look. Fixed seat cushions with pocket springs add extra comfort to its already pleasant depth and height. Our range includes designs with different armrests, a protruding part, a corner sofa and the option of adding a headboard. It's a beautiful and comfortable sofa that you can modify so as to perfectly suit your needs. We wouldn't be at all surprised if the Newman becomes your favourite, too!

Bas

- > Compact
- > High backrest: comfortable to sit in
- > Different leg design options

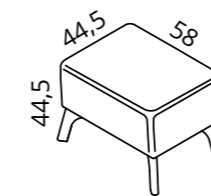

Design: Argo Tamm

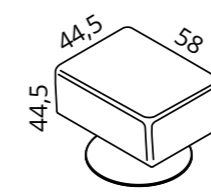

The idea for the Bas was born from an observation that a single, routine-breaking detail can make a room come alive and create a pleasant change in emotional tone. The Bas and its **versatile selection of leg designs and cover materials** will complement any home and sofa. But after you've discovered the Bas as a seat in its own right it's hard to treat it as a mere interior design element. You can add extra comfort with a pouf and a leg with a rocking mechanism.

Mini Bas

Intro

Intro to a stylish living room

This product has been created for:

- > Waiting areas
- > Informal meetings
- > Tight conditions

Design: Argo Tamm

In developing this armchair, designer Argo Tamm knew what he wanted the end result to be: compact, minimalist and of course comfortable, in line with the quality for which Softrend is renowned. With all the elegance of a sculpture, Intro is beautiful from every angle – but more than that, it is also inviting, as if calling to you to sit down and relax. Its form, though slender and curved, offers full support and will wrap you in its embrace.

Guaranteeing the durability of the armchair is its strong metal frame, cushioned with high resiliency moulded PU foam. Its solid timber revolving foot is offset with a contrasting metal line – a small but highly effective detail in an armchair that is already unique in form. There is a variety of fabrics to choose from, allowing you to design Intro to perfectly suit your home.

Product information

Materials

Frame: metal
Upholstery: high resiliency moulded PU foam
Cover material: range of fabrics available

Legs

Painted metal & solid timber; colour options:
white / oak, natural
grey / oak, natural
black / oak, natural
black / oak, black stain

Additional information

Covers are not removable; chair has a swivel function

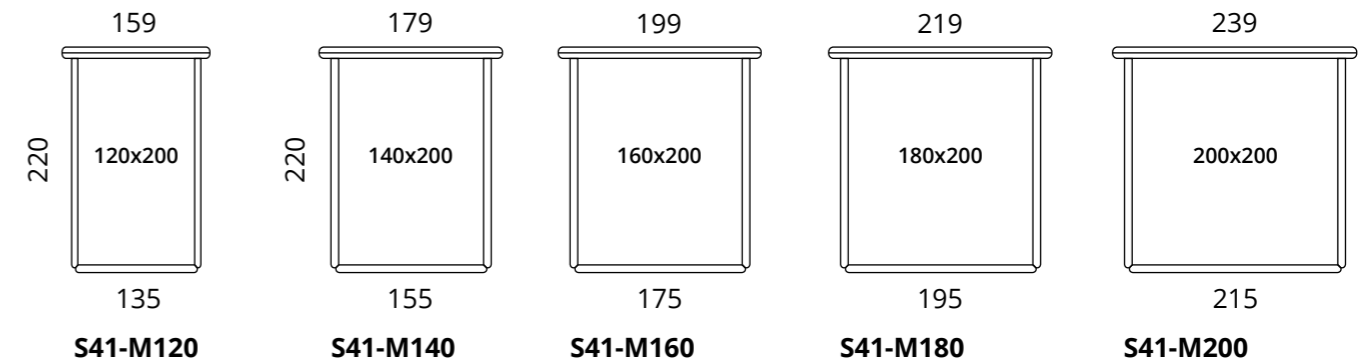

Beds

Cello

- > Minimalist design
- > Suitable for loft apartments
- > Soft all over, no sharp corners

This slender, low-lying bed is ideal for attic apartments or the space in front of windows, or for that matter anywhere you're looking to highlight the wall behind it. Contemporary in form, the Cello is super-soft and makes bedtime as cosy as can be.

Product information

Materials

solid wood and plywood frame; upholstered with durable foam

Legs

180 x 200 cm,
200 x 200 cm

All dimensions provided in centimetres.

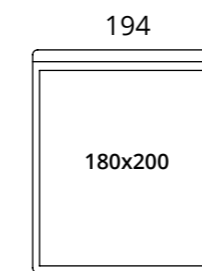

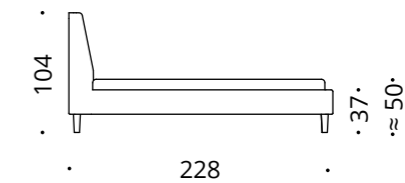

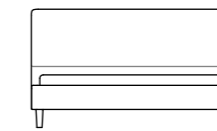

Fuuga

- > Cover material fully removable
- > Solutions for more comfortable lives: high legs
- > Slanted headboard – comfortable for sitting
- > Soft all over, no sharp corners

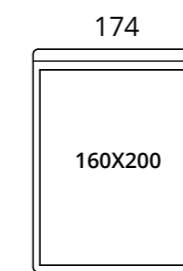

Design: Argo Tamm

This truly soft bed is light in form and has high legs and sufficient room underneath it for a robotic vacuum cleaner to skim through. The headboard has a slight slant to it to make it more comfortable to lean on when sitting up. The cover material is fully removable.

Opera

- > Fixed cover material
- > Storage-box version also available
- > Soft all over, no sharp corners

An elegant and soft bed with a beautifully designed headboard. The elegant softness of Opera brings to mind a picture of the velvety calm of night. It allows you to follow the relaxing flow. In order for you to feel great when waking up and starting the day, we designed the bed to be ergonomic and tall. You can also opt for a version with a storage box for your bed linen.
